

# Installing, configuring and using SIP Acrobits Softphone for iPhone, iPad or iPod Touch

# **INSTALLATION AND CONFIGURATION**

Download the software from App Store:

Initialize the app so it runs the set-up process for the first time:

On the following window, a series of options from different providers will be displayed. In this case we will create a custom account by clicking "Generic SIP Account".

Edit the New Account settings with the credentials provided by your PBX On The Cloud Account Manager.

*<u>Title</u>*: A name you want for your profile.

Username: Your extension number.

<u>Password</u>: Your extension password. Ask your PBX On The Cloud representative for it. Be very careful to type the password correctly as if it is wrong, your extension will be blocked (You can contact your PBX On The Cloud representative for help).

<u>Domain:</u> xyyy.pbxonthecloud.com:zzzz where xyyy is your Company Code, which are the 4 letters that identify your company with PBX On The Cloud service. Normally x is the first letter of your Company name first word and yyy are the first 3 letters of your Company name second word. If your Company name has only one word, then xyyy will be the first 4 letters of the Company name. <u>zzzz</u> would be the port where your server resides. Ask your PBX On The Cloud representative for it. Default is 5060.

<u>Display name</u>: Your name or Extension number and your name depending on your preference.

Once located in the main window (Dial Pad), you'll see the name of your SIP account and a green phone icon, meaning that your account is registered and ready to make calls.

# **USING THE SOFTPHONE**

On the main menu, you will see the keypad as well as some other icons that have a specific purpose:

Once you enter the number you wish to dial, click this button to start the call:

Once you enter a number, click this button to create a new contact:

If you wish to delete a number, just click this button to remove the last digit:

To browse all recent calls (Out/In/Missed), use this button:

To access your contact list, click this button:

To go back to the main keypad menu, click this button:

button located at the upper right corner.

#### **ACCEPTING OR DECLINING A CALL**

You can Answer, Ignore or Reject incoming calls just by clicking on the desired option when the call comes through. Ignoring a call will just mute the ringtone until the call is naturally sent to voicemail after certain time. Rejecting a call will forward it to your voicemail.

#### **PLACING A CALL**

Use the keypad to enter the number you wish to dial and then press following options:

, when the call is established, you will see the

to go back to the

To go to the main screen where all the options reside (Quickdial, History, Keypad and Contacts) click:

ongoing call just click

To mute/unmute your microphone, press:

To toggle between Speaker or Headset mode:

**Back To Call** 

. This feature is not currently supported by PBX On The Cloud.

To place the call on hold, press:

To resume the call press the same button.

You can record your calls by clicking:

To terminate the call, press:

While in a call, press to access your keypad and dial \*2. You will hear a dialtone and the initial call will be placed on hold. Dial the extension number you want to transfer to followed by #. Once the other extension answers, announce the transfer. If the

person decides to accept the call, press and the call will be transferred. If the person doesn't want to accept the call, you will return to the original call once the person hang up. If the other extension doesn't answer, you will be automatically reconnected to the original call.

# TO CHECK VOICE MAIL (And change you initial voice mail password):

To access your voice messages you have to dial \*97 as there is no Voicemail button designated just for this purpose.

You will be asked for your extension voice mail password followed by the # sign (1234# by default). You should change this voice mail password the first time you use the system. Hear the instructions to do it.

### TO CHECK FOR MISSED CALLS

Look for this icon: and click History on it. In this case, it will indicate you have 1 missed call.
